

CZECHIA

Date of data collection or reference period	Consumer prices on Monday
Reporting body	Czech Statistical Office
Reporting price discounts on motor fuels	No
Market coverage and data sources	Data sources: 9 oil companies, 2 large stores. These operate 1515 public petrol stations, which represents more than 40% of all public petrol stations in the country. Approximate shares of surveyed enterprises in total road transport consumption of petroleum products are as follows: 60% for premium unleaded gasoline, 50% for automotive diesel and 86% for LPG.
Price averages	Arithmetic average
Biofuels	The proportion of bio-components is voluntary and taxed together with the main components (fossil fuels). There are only the maximum limits: 5% by volume in every fuel specimen of unleaded petrol and 7% by volume in diesel. Tax allowances are only applicable to fuels with high percentage of biocomponents (e.g. diesel blends with no less than 30% of rapeseed oil FAME of volume), but these have marginal consumption and are not surveyed at present.
Other indirect taxes reported	NA
